## What is Energy Medicine?

Energy medicine works with the subtle energies of the body to help realign and relieve the emotional, physical, mental, and spiritual imbalances.

- Sixty to ninety percent of today's medical problems appear to be related to the mind-body-stress where drugs and surgery don't work.
- Neural plasticity allows you to rewrite your software code rather than being stuck with the old programming.
- Over time, our beliefs become our biology!

## Facilitator of People & Healing

“Leah is a talented facilitator of healing. She has the ability to help evoke that healing and bring it forward for the client. I highly recommend her services.” — Bob Nunley, PhD, Director of Admissions, HolosUniversity.org, Co-Chair of Wisdom Council, ISSSEEM.org

## Powerful Approach

Root-cause, result-based, cutting-edge sessions. I work at the energetic level, making phone, distant, and absentee work as powerful as in-person. My clients say this approach is more powerful because of the great outcomes they experience.

“Leah brings forward healing in her clients and gives them the gift of seeing themselves more clearly. She incorporates a wide variety of skills in working with clients, and her approach is results-based. I highly recommend her services.” — Anne F. Salisbury, PhD, MBA, CCHt Founder & ED

## Release What Is Blocking You!

*“Leah taught me how to relieve the negative thinking and methods to help me fall asleep faster. As Leah and I continue to work together, I see myself more empowered, stronger emotionally, and so much more confident.” — E .Silvia*
